

About Current

At Current, we are Always On and working to improve lives with the most expansive portfolio of sustainable advanced lighting and intelligent controls that reliably meet our customers' needs. We embrace change and take risks to bring solutions that meet the challenge, move us forward, and make our customers successful.

Part of that success is providing unprecedented educational opportunities for customers and channel partners. Through The Institute, Current offers expertise and training for the lighting and controls professionals, including providing accredited continuing education (CEU) modules to help maintain current certifications. Six locations offer instructor-led events with an online university offering for self-paced, individualized learning. With 200 years of innovation under our belts, Current's robust portfolio and complementary training facilities provide a total solutions package to our customers.

From architectural luminaires to integrated controls, LED lamps and everything in-between, Current's approach to delivering solutions, service and uncompromising quality advances our customers businesses while making a sustainable difference. Current's specification-grade products provide long-term and leading performance, reduce energy demand and have become synonymous with reimagined physical spaces.

Current's portfolio emphasizes an innovative new-product based structure that focuses on bringing customers the best possible range of solutions and technologies. Several products have been recognized with prestigious industry awards, including Beacon -- honored with *LEDs Magazine's* 2023 BrightStar award and NX Lighting Controls earning *Consulting-Specifying Engineer (CSE) Magazine's* Gold Award. Current's trusted family of brands include several of the most well-known products in the industry:

HLI Brands:

GLI Brands
